

Interplastica 2022

L'evoluzione dell'industria.

Dal 25 al 28 Gennaio si svolgerà la fiera INTERPLASTICA a Mosca, importantissima vetrina per il mondo della plastica verso un mercato con grandissime potenzialità e in continua espansione. In questa edizione COMERIO ERCOLE presenterà le proprie proposte di consolidato livello qualitativo e le novità tecnologiche dedicate a questo settore produttivo rese possibili anche dai concetti dell'INDUSTRIA 4.0 i quali hanno portato miglioramenti sia a livello produttivo sia a livello di automatizzazione dei processi di lavorazione. Lo staff della COMERIO ERCOLE sarà lieto di accogliervi allo stand 23C06.

Impressive calender ready for shipment

Interplastica 2022

The evolution of the industry in the plastic calendering field

INTERPLASTICA fair will take place in Moscow from 25 till 28 January. In this edition COMERIO ERCOLE will present its proposal of consolidated quality level and the technological innovation dedicated to this production field.

The need to make systems that are "friendly for the end user" is a challenge that forces the manufacturers of machines to guarantee a very high level of automation. Making the lines as automatic as possible allows the operators to dedicate themselves to supervision activities with a significant increase level of quality of the final product while reducing the possibility of humans errors. COMERIO ERCOLE Industry 4.0 concepts applied to calendering lines increase the quality level also with the precise traceability of each production batch, recording all the data of incoming raw materials, the main production parameters and the identification of all the reels produced, in order to be able to identify at any time, the relevant data of each single bobbin rder to be able to identify at any time, the relevant data of each single bobbin.

COMERIO ERCOLE staff will be happy to welcome you at Booth 23C06.

What was never considered possible is now possible!

Greener and greener - ESG

Eco-sustainability is a very important topic for COMERIO ERCOLE. Over the years, a lot of investments have been made to improve the environmental impact caused by the activities related to the company. COMERIO ERCOLE has just completed the conversion of all internal forklifts which are now electric and is going to verify the advisability of introducing the same technology also for vehicles suitable for transport people and goods. In December COMERIO ERCOLE has also installed and activated two double electric charging points for the company vehicles and available for the visitors too.
