

COMERIO ERCOLE

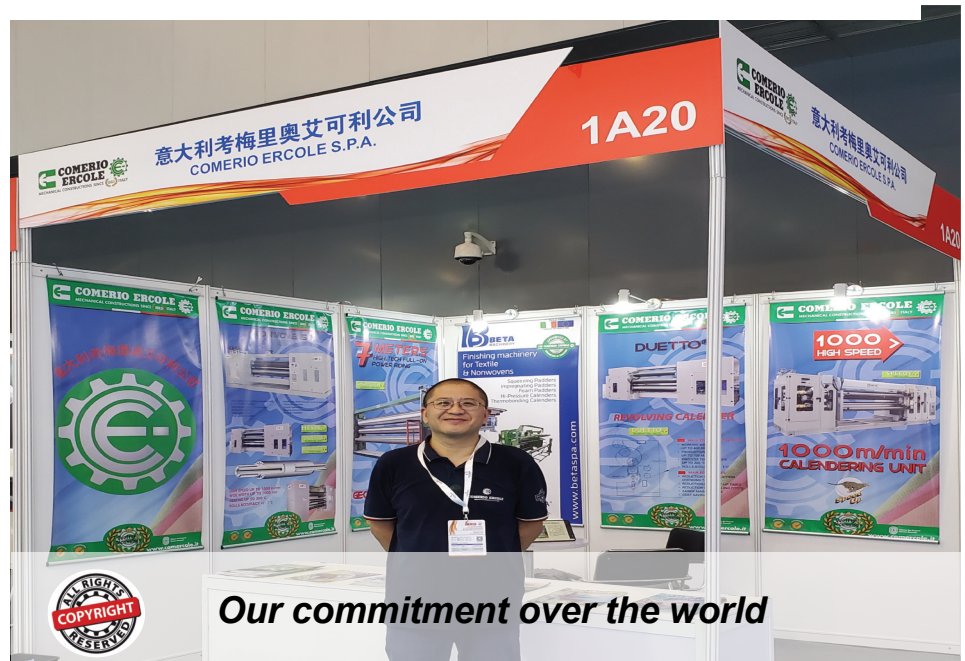

MECHANICAL CONSTRUCTIONS SINCE 1885 ITALY

Fiera Anex a Shanghai

La più importante fiera del settore tessuto nontessuto.

Dal 22 al 24 Luglio si è svolta la fiera ANEX a SHANGHAI, che rappresenta forse la maggior vetrina espositiva per il mondo del tessuto nontessuto. In questa edizione COMERIO ERCOLE presenta una CALANDRA SPECIALE "PUNTA A PUNTA". Macchinario che serve principalmente per la laminazione di manufatti ad alto potere di assorbenza. Il macchinario è caratterizzato da una costruzione meccanica che possiamo definire "da orologeria" tanta è la precisione meccanica assicurata dalla macchina. Siamo certi che il mercato cinese, in fase di boom economico post pandemico, darà come d'abitudine grande affluenza alla esibizione e apprezzerà questo ultimo prodotto innovativo COMERIO ERCOLE.

Our commitment over the world

Anex international exhibition in Shanghai

The most important exhibition in the non-woven fabric sector.

During July, the ANEX fair is held in SHANGHAI, which is surely the largest showcase for the world of non-woven fabric, where COMERIO ERCOLE has been operating steadily since the origins of this specialty, origins that date back thirty years ago. COMERIO ERCOLE is among the "historical" participants of the event having joined since the very first editions more than twenty years ago.

In this edition, COMERIO ERCOLE will present in addition to the usual variety of calenders for each technology variation applicable to nonwovens, a SPECIAL "PIN TO PIN" CALANDER. High precision embossing calender that will mainly be used for the lamination of products with a high absorbency power, for example absorbents for food trays or filters with very high air permeability and very high filtering power.

The machine is characterized by a mechanical construction that we can define as "watchmaking" such is the mechanical precision ensured by the machine.

We are sure that the Chinese market, in the post-pandemic economic boom phase, will, as usual, give a large turnout at the exhibition, and will appreciate this latest and innovative product from COMERIO ERCOLE.

What was never considered possible is now possible!

Calender rolls refurbishment in the USA

Specialized technicians of COMERIO ERCOLE team, at the beginning of July, performed a complete maintenance service in a plant in the USA for an important international customer.

The work consisted in a refurbishment activity and replacing the calender rolls during the limited summer production stop period which usually takes place near the Independence Day (4th July). For this work 2 shifts of 24 hours have been guaranteed COMERIO ERCOLE team, once again, demonstrated its efficiency and professionalism. The Customer was assisted in full compliance with the deadlines and procedures agreed, despite complications due to the international health situation, such as the decrease in flights for international routes and all bureaucratic / health procedures related to COVID, to be respected when traveling to others continents.

After-sales customer service has always been one of the strong of COMERIO ERCOLE, which constantly works to find the best methods to fully satisfy the needs of customers all over the world as 360° solution provider.
