

# COMERIO ERCOLE

MECHANICAL CONSTRUCTIONS SINCE 1885 ITALY

## Settembre dinamico & innovativo

**Nuovo carro ponte e partecipazione  
fiera INDEX20**

Il mese di Settembre alla COMERIO ERCOLE è stato un mese dinamico e ha portato una grande novità.

Presso il nostro capannone è stato montato e collaudato un carro ponte aggiuntivo dotato di radiocomando, sistema di ponderazione gemellata e di un sistema di monitoraggio Novamaster per aumentare la nostra produttività e la nostra efficienza.

Sono iniziati i preparativi anche per la fiera INDEX20, la fiera più importante per quanto riguarda il mercato mondiale della lavorazione del tessuto non tessuto. L'esposizione avverrà dal 19 al 22 Ottobre nella città di Ginevra e noi saremo presenti allo stand n° 1122.

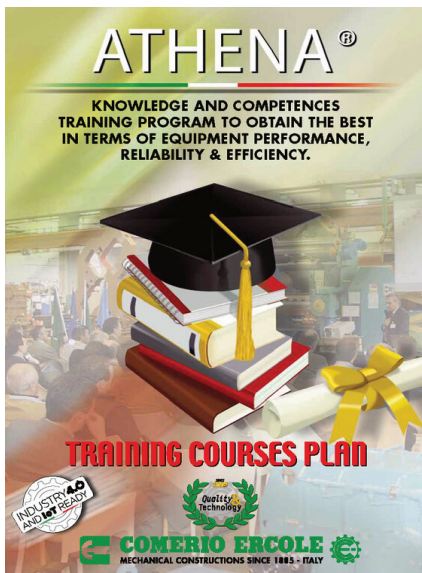

## Dynamic and innovative September

**New bridge crane & Index20 exhibition.**

The month of September at COMERIO ERCOLE has been a dynamic period and brought great news. An additional bridge crane included radio remote control, twin weighting system, Novamaster tandem hoist monitoring system was assembled and tested in our warehouse to increase our productivity and efficiency.

Preparations have also begun for the INDEX20 exhibition, the most important fair in the world market for non-woven fabric processing for hygienic and sanitary use. The exhibition will take place from October 19 to 21 in the city of Geneva where we will be present at stand n° 1122. INDEX20 exhibition will be an opportunity to raise awareness of our technologies and our calendars created specifically for nonwovens fabric sector. In particular, lights on our DUETTO revolver calendar, which can be equipped with our 3D HELIX technology. The combination of these two COMERIO ERCOLE prototypes allows to produce faster and obtain a 3D effect on both sides of the material.

*What was never considered possible is now possible!*

## Athena training course plan and our R&D laboratories

On last September 14th, COMERIO ERCOLE hosted a delegation of experts from an important international reality. In compliance with all the laws in force to cope with the current health situation, the guests were able to have a general overview of the reality of COMERIO ERCOLE Company with roots in 1885 and of all the important production and technological implementations that have been in more than 130 years of history. During the guided tour, customers were able to admire our two production halls and our two laboratories dedicated to research and development. In these laboratories were carried out some tests to demonstrate all their versatility, usefulness and technology. At the conclusion of the tour, our visitors were able to participate to ATHENA, our Knowledge and competences training program to obtain the best in terms of equipment performance, reliability & efficiency.
