Special edition
10-2022

K2022

La fiera internazionale N°1 del mondo per la plastica e la gomma.

Grande entusiasmo e grande partecipazione con tantissimi visitatori da tutto il mondo. Per tutto il periodo il nostro team di circa 20 persone tra tecnici di processo e prodotto ed area manager si sono turnati nei sette giorni di manifestazione fieristica K2022 a Dusseldorf. Sono state presentate soluzioni tecniche innovative sia per il comparto macchinari per materie plastiche che lavorazione della gomma. In prima assoluta è stata presentata con un simulatore di processo la nuova ed innovativa piattaforma digitale HERCULES40® che permette di dare valore alla mole di dati già presenti sui macchinari di ultima generazione. Una importante collaborazione societaria con la nota società SASPOL è stata annunciata proprio durante la fiera ed apre a nuove prospettive di mercato a favore dei tanti utilizzatori di presse ad alte prestazioni.

K2022 expo

The world's N°1 International Trade fair for plastic and rubber

Great enthusiasm and great participation with many visitors from all over the world. Throughout the period, our team of about 20 people including process and product engineers and area managers took turns during the seven days of the K2022 exhibition in Dusseldorf. Innovative technical solutions were presented for the machinery sector both for plastics and rubber processing. In the first place, the new and innovative digital platform HERCULES40® was presented with a process simulator, which allows to give value to the amount of data already present on the latest generation machinery. An important corporate collaboration with the SASPOL company was announced during the fair and opens up new market prospects in favor of the many users of high performance presses. COMERIO ERCOLE is the mixing and calendering specialist since 1885 and constantly develops new technological solutions both for rubber industry and plastic field. During the exhibition a "giant" plastic calenderline 2500 mm has been presented based on "turn key project" engineered by our team according customer requirements, as well as several rubber innovative devices have been presented during the show like the new HYDROTHERM® thermal expansion correction device granting micrometric gap tuning. Concerning nonwovens industry COMERIO ERCOLE has presented the new high performance activation dual embossing calender PICKBREAKER® for thermoplastic films as well as the super calender 8 meters for geomembrane GEOWIDTH® granting superior performances based on customized rolls configuration with monoblock configuration. STAY TUNED WITH US!

What was never considered possible is now possible!

SASPOL & COMERIO ERCOLE ALLIANCE

COMERIO ERCOLE group based on its industrial partnership with the company COMERC INTERNATIONAL has enlarged the presence into rubber production field becoming shareholder of the Italian company SASMAC INTERNATIONAL SRL brand owner of well-known SASPOL technology. SASPOL was established in 1961 starting the production of small rubber and plastic presses and in the following years bigger presses with always higher pressure, nowadays particularly involved in conveyor belts, retreading tires, solid tires and thermoplastic sheets PP-PE-HDPE-UGMWPE. Main SASPOL values are based on "family philosophy" and "production flexibility", the announcement of the new alliance for Plastic & Rubber field has been done during last days at K2022 Exhibition show in Dusseldorf.
