

COMERIO ERCOLE

QUALITY & TECHNOLOGY SINCE \$\frac{1}{1885}

09-2022

ITEC & K2022

Si ritorna alla fiere in tutto il mondo

Con settembre si ritorna in fiera in tutto il mondo ed in presenza dopo praticamente 2 anni di manifestazioni fieristiche in remoto. Già una prima importante fiera internazionale è stata quella di Hannover TIRE TECHNOLOGY EXPO nel mese di maggio e poi successivamente quella di ALGERI nel mese di Giugno. Da pochi giorni si è conclusa l'esposizione internazionale ITEC 2022 specializzata per il comparto pneumatici in USA nella città di AKRON e la nostra macchina organizzativa è a pieno regime per la preparazione dell'importante appuntamento a DUSSELDORF per la fiera internazionale materiale plastiche e gomma K2022.Il nostro team dal 19 al 26 Ottobre sarà ben lieto di ricevervi al nostro tradizionale grande stand 16F21 nella HALL16.

PRESS RELEASE "K2022 PREVIEW"

During K 2022 COMERIO ERCOLE will present some very important technological innovations recently developed in its plastic and rubber main field of activity. COMERIO ERCOLE has recently introduced a new Digital Platform named HERCULES40® which is aimed to supply to COMERIO ERCOLE customers a data-driven analysis tool for a continuous improvement of production process, including energy consumption optimization, as well as added value after sales services.

COMERIO ERCOLE is more and more concentrated on the end user support and two recent new products have been presented to our customers just reconfirming our firm commitment "on site" rolls maintenance process. The "heart" of any calendering process is linked to rolls status therefore we have developed two alternative tools supporting "on site" maintenance process. With SANDBLASTER any need to keep and/or recovery of a certain roughness is now permitted as well as with the POLISHER any need to clean and recovery rolls surface is now permitted too with dedicate "on site" tools put at disposal of maintenance team.
