

# COMERIO ERCOLE

QUALITY & TECHNOLOGY SINCE 1885 ITALY

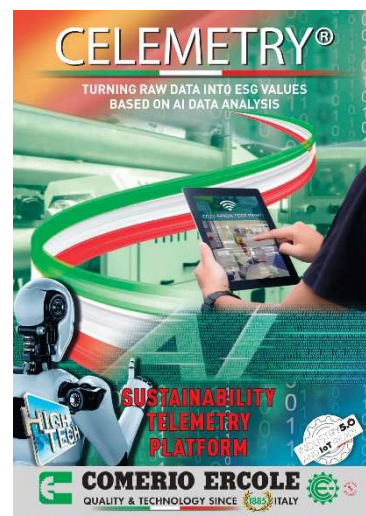

## INFO NEWS

**IN BREVE:** Dopo il successo della nostra partecipazione a RubberTech China, dove abbiamo avuto l'occasione di incontrare clienti, partner e professionisti del settore da tutto il mondo, siamo ora pronti a vivere il prossimo grande appuntamento: K 2025 a Düsseldorf, Hall 16 – Stand F21. Questa fiera rappresenta un palcoscenico internazionale straordinario per presentare le nostre più recenti innovazioni e condividere la nostra visione orientata a digitalizzazione, efficienza e sostenibilità. Tra i protagonisti ci sarà CELEMETRY®, la nuova piattaforma digitale che, attraverso un'applicazione web semplice e intuitiva, calcola in tempo reale l'impronta di carbonio CO<sub>2</sub>. Grazie all'integrazione con intelligenza artificiale e analisi avanzata dei dati, CELEMETRY® trasforma i dati grezzi in valori ESG concreti.

We are excited to announce our participation at K 2025, the world's premier trade fair for plastics and rubber. The countdown has officially begun and our team is working with passion and energy to prepare an outstanding experience for all our visitors. You will find us at Hall 16 - Stand F21, ready to share the very best of our technology, expertise and vision for the future. This year marks an important milestone for Comerio Ercole, as we continue to strengthen our reputation as a pioneer in innovation and sustainability. At K, we will proudly showcase our latest developments with a special spotlight on CELEMETRY®, our brand-new sustainability telemetry platform. CELEMETRY® is much more than a digital tool: it is a forward-looking solution designed to help companies embrace the challenges of sustainable production. Through a simplified web application, CELEMETRY® calculates the CO<sub>2</sub> carbon footprint in real time by monitoring electricity, gas and water consumption.

Thanks to the integration of artificial intelligence and advanced data analysis, it transforms raw industrial data into clear ESG values, supporting companies in their journey towards greener and more responsible operations. With customizable dashboards, instant alerts and secure data transmission, CELEMETRY® makes sustainability tangible and actionable. It empowers manufacturers to reduce waste, optimize resources and meet sustainability reporting requirements with ease. We cannot wait to welcome you at K 2025. Visit us at Stand 16F21 and discover how Comerio Ercole is turning data into sustainable value and shaping the future of our industry together.

8-15 OCTOBER  
Düsseldorf, Germany

COMERIO1885  
HOLDING Società a Rischio

1885-2025 140° Anniversary Celebration

Comerio Ercole is proud to report that RubberTech China once again proved to be a remarkable venue for showcasing its expertise, innovations, and products. The fair was vibrant, dynamic and full of promising opportunities.

At our stand, attention was high: attendees were especially interested in our latest rubber presses and processing equipment and the feedback was overwhelmingly positive. Many participants commented on the build quality, precision and energy-efficiency of our solutions, validating the investments Comerio Ercole has made in R&D and sustainable engineering.

A highlight this year was the outstanding contribution of the Chinese Comerio Ercole team. Their professionalism, fluency in both technical and business communication and deep understanding of local market needs enabled us not only to engage more deeply with visitors but also to build stronger relationships with partners and potential clients in the region. They were instrumental in arranging meetings, demonstrating our equipment and translating technical specifications in real time. This local presence significantly boosted our credibility and reach in the Chinese market.

Comerio Ercole leaves with new leads, renewed partnerships and increased confidence in its ability to grow in Asia. We look forward to returning in strength next year!
