

COMERIO ERCOLE

QUALITY & TECHNOLOGY SINCE 1885 ITALY

INFO NEWS

IN BREVE:

Comerio Ercole ha preso parte a fiere internazionali ottenendo ottimi risultati commerciali e di visibilità. Riconosciuta tra i “Marchi Storici di Interesse Nazionale” a Roma, conferma il suo ruolo nel Made in Italy. L’azienda promuove sostenibilità e innovazione: ha donato biciclette agli studenti LIUC e ha ricevuto il Premio Impresa Ambiente per LOGOS® a Venezia, tecnologia che ricicla gomma riducendo emissioni e supportando l’economia circolare.

The gesture also carries a deeper meaning: it is a simple but tangible example of how social responsibility can take shape through projects that improve everyday life and strengthen the connection between business, education and territory.

At the same time, Comerio Ercole has also received important national recognition for its commitment to sustainable innovation. The company was awarded at the XIII edition of the “Premio Impresa Ambiente” in the category “Best Process/Technology for Sustainable Development” for LOGOS®, a devulcanization system that transforms rubber production waste and end-of-life tyres into recycled compounds with mechanical and dynamic properties comparable to virgin materials while reducing emissions during processing. Promoted by the Venice Rovigo Chamber of Commerce and Unioncamere, Premio Impresa Ambiente is presented by the organizers as Italy’s leading recognition for companies and organizations that contribute innovative solutions in the fields of sustainable development, environmental responsibility and circular economy. For Comerio Ercole, this award represents an important milestone but also confirmation that industrial excellence and environmental responsibility can grow together.

These two initiatives, different in nature but closely linked in spirit, clearly express who we are. Comerio Ercole is a manufacturing company with deep industrial roots but also a business that believes in giving back, supporting its local community and creating innovation that generates a positive impact beyond production itself. **Because true progress is measured not only by what we build but also by the value we create for people and for the world around us.**

Volume 2026 - Ed.04

Comerio Ercole recently took part in three major international trade fairs: the Indian Rubber Expo (IRE), Chinaplas and Techtextil. These events provided key opportunities to showcase its calendering technologies and connect with customers and partners across different markets. At each fair, the company recorded strong interest from both long-standing partners and new potential clients, enabling valuable exchanges and insights into current industry trends and evolving requirements. The overall outcome exceeded expectations in terms of visibility and commercial prospects.

A major highlight was the “Industry Pioneer Award” received at Chinaplas, presented by Adsale Plastics Network in collaboration with the fair for our calendering lines suitable for PVC film, recognizing Comerio Ercole’s innovation, expertise and continuous technological development. Comerio Ercole will continue participating in international events to stay close to global market dynamics and customer needs.

On April 15th, 2026, the Italian Ministry of Enterprises and Made in Italy celebrated the milestone of 1,000 “Historical Brands of National Interest” during the National Made in Italy Day in Rome. The initiative highlights companies that combine heritage, innovation and a strong contribution to the national economy. At this important institutional event, Comerio Ercole, being part of the Historical Brands registry, confirms its contribution to strengthening the international reputation of Made in Italy, demonstrating how experience and Italianness can successfully coexist in today’s market.

Innovation, engineered for what's next.

At Comerio Ercole, innovation has always been a defining part of our identity. But for us, building value means more than designing and manufacturing advanced industrial solutions. It also means contributing to the well-being of the communities around us, supporting young people and promoting a more sustainable future through concrete actions.

This commitment recently found expression in two meaningful initiatives that reflect the broader vision of our company. On the one hand, Comerio Ercole donated ten mountain bikes to the LIUC University Residence, in connection with the inauguration of the “Move On” cycle-pedestrian route in Castellanza. The bicycles are intended to support students in their daily mobility, encouraging a more sustainable lifestyle and offering a practical service to young people living away from home. In LIUC’s own words, the initiative is part of a broader path focused on soft and sustainable mobility.
