

COMERIO ERCOLE

QUALITY & TECHNOLOGY SINCE 1885 ITALY

INFO NEWS

IN BREVE: Comerio Ercole prosegue il 2026 con grande dinamismo, confermando il positivo andamento dei mercati di riferimento. Anche durante il periodo estivo, l'azienda mantiene operative le attività produttive, di engineering, assistenza tecnica e customer service, garantendo continuità ai progetti internazionali. Diverse linee complete di calandratura e mixing mills sono state recentemente completate e spedite, mentre resta forte la domanda nei settori tire e rubber, insieme al crescente interesse per PVC, nonwoven e applicazioni industriali speciali. Tra i risultati più recenti spicca la realizzazione in tempi record di una linea completa per steel cord. Nei prossimi mesi Comerio Ercole presenterà nuovi sviluppi tecnologici e parteciperà a RubberTech China 2026 e CINTe Techtextil China 2026.

COMERIO1885
HOLDING Società per Azioni

Volume 2026 - Ed.07

Comerio Ercole is pleased to announce its participation in Cinte Techtextil China 2026, one of Asia's leading international trade fairs for technical textiles and nonwovens, taking place from September 1st to 3rd, 2026 at the Shanghai New International Expo Centre (SNIEC). Visitors will find Comerio Ercole in Hall W5 - Stand W5B10, within the European Zone.

The exhibition will be an important opportunity to present Comerio Ercole's expertise and technological solutions for the nonwovens industry, with a particular focus on advanced calendering, thermal bonding and embossing technologies, as well as tailor-made solutions developed according to specific production requirements. Participation in Cinte Techtextil China will also allow Comerio Ercole to strengthen relationships with customers and partners, develop new business opportunities and further consolidate its presence in the Asian market.

The Comerio Ercole team looks forward to welcoming customers, partners and industry professionals in Shanghai!

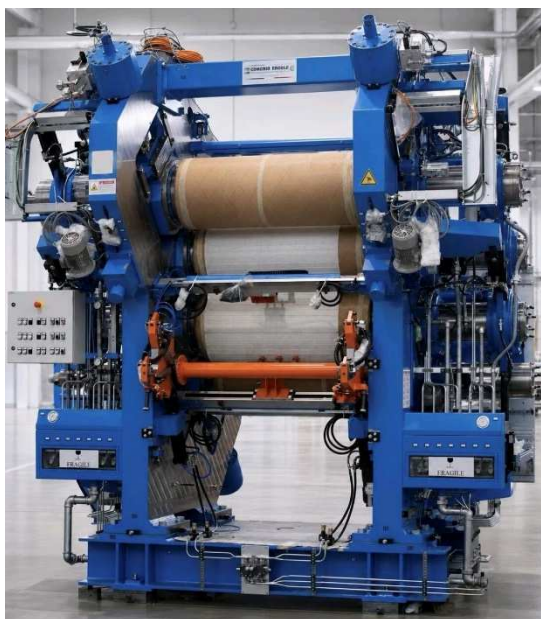

Following a very intense first half of the year, July has been another dynamic month for Comerio Ercole, confirming the good momentum that continues to characterize our industries. While many companies are preparing for the traditional summer shutdown, Comerio Ercole remains operational.

Different complete calendering lines and mixing mills have been completed and shipped to customers worldwide before the August period, ensuring projects continue according to schedule. At the same time, engineering, technical support and customer service activities will remain active throughout August, allowing the company to continue supporting customers.

The overall market continues to perform positively, with particularly strong demand from the tire and rubber industries, where investments in new production capacity and modernization projects remain significant. At the same time, interest continues to grow in PVC film production, nonwoven technologies and several specialized industrial applications, confirming the effectiveness of our diversified technological portfolio.

Innovation, engineered for what's next.

Summer never stops innovation! Just a short while ago, we in Comerio Ercole successfully engineered, manufactured and installed a complete steel cord calendering line in record time. It was only possible thanks to an extraordinary effort from our engineers, production teams, project managers, suppliers and service technicians, all working together with a single objective: delivering excellence on time.

Yes, it is summer. Yes, temperatures in Italy are high. But innovation never takes a holiday. At Comerio Ercole, our main workshop and technical assistance office remain operational because our customers around the world continue to rely on us for complex projects and solutions. For more than a century, our commitment has remained the same: transforming ideas into industrial reality through engineering, manufacturing and continuous innovation.

The coming months will be particularly exciting: after August, we will unveil some new important projects and technological developments in the rubber machinery industry that we cannot wait to share. We will also be present at major international exhibitions, including RubberTech China 2026 and CINTe Techtextil, together with other important events across different continents, where we look forward to meeting customers, partners and industry professionals from all over the world. Thank you to everyone who contributes every day to making these achievements possible. The journey continues... and the best is yet to come!!
